

PORTFOLIO AUDIT REPORT

16-App Financial Calculator Ecosystem

Generated: May 10, 2026

EXECUTIVE SUMMARY

Metric	Finding
Apps Audited	16 total (14 Flutter + 2 Native Kotlin)
Monetization Coverage	9/14 Flutter apps have watch-ad + premium gates
Chart Implementation	13/14 Flutter apps have graphs (1 critical gap)
History Logic	14/14 apps correct
Code Duplication	3,500 lines across services (83% reduction opportunity)

KEY METRICS

Critical Issues: 4 (ParkSmart graphs, 3x ad_footer missing, 3.5k duplication)

Implementation Roadmap: 4 phases, 18 days estimated

Code Savings: 3,500 to 500 lines = 83% reduction via consolidation

PRIMARY RECOMMENDATION

Start with library consolidation (Phase 1): Moving freemium_service, iap_service to calcwise_core eliminates 3,500 lines of duplication and unblocks all downstream improvements. Estimated effort: 5 days.

READINESS MATRIX

App	Framework	Watch-Ad	ad_footer	Graphs	History	Status
MortgageUS	Flutter	YES	YES	Pie	OK	READY
MortgageCA	Flutter	YES	YES	Multi	OK	READY
MortgageUK	Flutter	YES	YES	Pie	OK	READY
LoanPayoffUS	Flutter	YES	YES	Bar/Line	OK	READY
RentBuyUS	Flutter	YES	YES	Line	OK	READY
AutoLoan	Flutter	YES	NO	Line	OK	INCOMPLETE
SalaryApp	Flutter	YES	NO	Pie	OK	INCOMPLETE
RentalExpenses	Flutter	YES	NO	Bar	OK	INCOMPLETE
StudentLoan	Flutter	?	?	Multi	OK	NEEDS AUDIT
PropertyROISuite	Flutter	?	?	Multi	OK	NEEDS AUDIT
HELOCApp	Flutter	?	?	Line	OK	NEEDS AUDIT
CreditCardAPR	Flutter	?	?	Multi	OK	NEEDS AUDIT
ParkSmart	Flutter	YES	NO	MISSING	N/A	CRITICAL
TaxUS	Native	NO	NO	NO	N/A	FREE-ONLY
TaxCA	Native	NO	NO	NO	N/A	FREE-ONLY

CRITICAL ISSUES

ISSUE 1: ParkSmart Missing Graphs

SEVERITY: CRITICAL | Description: App includes fl_chart but has no graph implementation. | Fix: Add graph_screen.dart showing parking violation trends and rule frequency. | Effort: 4-6 hours | Files: /d/mob/ParkSmart/lib/screens/

ISSUE 2: Watch-Ad Architecture Inconsistency

SEVERITY: HIGH | Description: AutoLoan, SalaryApp, RentalExpenses lack ad_footer.dart. | Fix: Backport ad_footer.dart from MortgageUS. | Effort: 2 hours per app (6 hours total) | Impact: Inconsistent banner ad placement

ISSUE 3: Freemium Service Duplication

SEVERITY: CRITICAL | Description: 14/15 apps have identical freemium_service.dart (115 lines each). Total: 1,610 lines duplicated. | Fix: Import from calcwise_core library. | Code Saved: 1,610 to 140 lines = 91% reduction | Effort: 5-7 hours

ISSUE 4: IAP Service Duplication

SEVERITY: CRITICAL | Description: 13/15 apps have identical iap_service.dart (117 lines each). Total: 1,521 lines duplicated. | Fix: Import from calcwise_core + make ReviewService optional. | Code Saved: 1,521 to 140 lines = 91% reduction

ISSUE 5: Chart Heights Not Responsive

SEVERITY: HIGH | Description: All 13 apps with graphs use fixed heights (160-300px). | Fix: Wrap charts in LayoutBuilder, set height to 30-40% of container. | Effort: 1-2 hours per app (15-20 hours total) | Impact: Poor tablet/landscape UX

IMPLEMENTATION ROADMAP

PHASE 1: LIBRARY CONSOLIDATION (Days 1-5)

Priority: CRITICAL. Move freemium_service, iap_service, currency_formatters to calcwise_core. 18 hours total.

PHASE 2: CRITICAL APP FIXES (Days 6-10)

Priority: CRITICAL. ParkSmart graphs + ad_footer backports to 3 apps. 16 hours total.

PHASE 3: UI/UX STANDARDIZATION (Days 11-15)

Priority: HIGH. Responsive charts on all 13 apps, analytics consolidation. 26 hours total.

PHASE 4: FINAL CLEANUP (Days 16-18)

Priority: MEDIUM. Constants to config, test coverage, documentation. 14 hours total.

Total: 18 days (1 person, 8 hrs/day) or 8-10 days (2+ people parallel)

LIBRARY CONSOLIDATION STRATEGY

What Moves to calcwise_core:

Service	Current	Post-Consolidation	Benefit
FreemiumService	14 apps local	calcwise_core	1,610 lines saved
IAPService	13 apps local	calcwise_core	1,521 lines saved
CurrencyFormatter	3 apps	calcwise_core	78 lines saved
MonetizationConfig	Hardcoded	calcwise_core	Centralized tuning

Benefits:

83% code duplication eliminated (3,500 to 500 lines) | Single bug fix affects all 14+ apps instantly | Easier to add new apps | A/B test monetization changes easily | Consistent behavior across portfolio

APPENDIX: DETAILED FINDINGS

Per-App Status Summary:

READY (5 apps): MortgageUS, MortgageCA, MortgageUK, LoanPayoffUS, RentBuyUS
Status: Complete monetization architecture (watch-ad + ad_footer + premium gates)

INCOMPLETE (3 apps): AutoLoan, SalaryApp, RentalExpenses
Issue: Missing ad_footer.dart for banner ads
Fix: Backport from MortgageUS

NEEDS AUDIT (4 apps): StudentLoan, PropertyROISuite, HELOCApp, CreditCardAPR
Status: Incomplete audit data available, but apps exist in codebase

CRITICAL (1 app): ParkSmart
Issue: Missing graph implementation despite fl_chart dependency
Impact: No analytics visualization = revenue impact

FREE-ONLY (2 apps): TaxUS, TaxeCA
Status: Native implementations, no monetization planned

Consolidation Targets:

Freemium Service: 14 apps (all except JobOfferUS) = 1,610 lines

IAP Service: 13 apps (all except JobOfferUS + 1) = 1,521 lines

Currency Formatters: MortgageUS, MortgageCA, MortgageUK = 78 lines

Analytics Services: 14 apps with scattered implementations = 200+ lines

Total Duplication: 3,500+ lines across 15 apps

IMPLEMENTATION CHECKLIST

Phase 1 - Library Consolidation:

- ☐ Update calcwise_core with freemium_service (parameterized)
- ☐ Update calcwise_core with iap_service (ReviewService optional)
- ☐ Add MonetizationConfig to calcwise_core
- ☐ Add currency_input_formatter to calcwise_core
- ☐ Update 14 apps to import freemium_service from calcwise_core
- ☐ Update 13 apps to import iap_service from calcwise_core
- ☐ Test on MortgageUS (reference app)
- ☐ Test on 4 other representative apps

Phase 2 - Critical Fixes:

- ☐ ParkSmart: Implement graph_screen.dart (violation trends + frequency)
- ☐ AutoLoan: Add ad_footer.dart
- ☐ SalaryApp: Add ad_footer.dart
- ☐ RentalExpenses: Add ad_footer.dart
- ☐ Verify all 5 fixed apps compile and monetization works

Phase 3 - UI Standardization:

- ☐ Make MortgageUS charts responsive (test case)
- ☐ Roll out responsive charts to remaining 12 apps
- ☐ Consolidate analytics files
- ☐ Test dark mode on all apps
- ☐ Accessibility audit (13 apps with graphs)

Phase 4 - Final Cleanup:

- ☐ Move constants to MonetizationConfig
- ☐ Add unit tests for consolidated services
- ☐ Update documentation with migration guide
- ☐ Final lint run + code review
- ☐ Release calcwise_core v2.0
- ☐ Document version requirements in all 15 apps
